FOR IMMEDIATE RELEASE:

TeleCents Communications Announces Promotional Codes For SendGlobal International Cellular Airtime

WALLED LAKE, Mich., June 29- TeleCents Communications, Inc., a trendsetter in the prepaid telecommunications arena, continued its streak of innovation by announcing at Dollar Store Expo 2005 in Las Vegas the availability of promotional codes for its groundbreaking SendGlobal international cellular calling product. The promotional codes will allow retailers and wholesalers alike to give \$2 in free SendGlobal international calling away to all customers.

SendGlobal currently allows the consumer to make phone calls from cellular and land based lines at discounted rates without compromising quality. "The addition of promotional codes to the SendGlobal lineup will fundamentally change our market because large numbers of customers will have the opportunity to try our product before purchasing it. The increased visibility of SendGlobal because of the promotional codes handed out by manufacturers, distributors, and retailers will bring new customers to our money saving product," says Jim Headley, TeleCents Vice-President of New Business Development.

The SendGlobal promotional codes will allow the consumer to visit the SendGlobal website and redeem a coupon instantly for \$2 in free international calling. The distributor of the promotional code, whether a retailer or a manufacturer of products, will receive a commission on all further purchases connected with its promotional code. "With over 75% of consumers recharging their accounts on previous "Try It Free" promotions, the SendGlobal promotional code can be a true money maker for companies of all sizes," says Headley.

SendGlobal is a long distance service that utilizes tier 1 carriers and can be used from both cellular and land based phone lines. While it is primarily targeted as a tool for pin-less international dialing, it can also be used as a primary method of calling within the United States. The SendGlobal service allows up to eight phone numbers to be added to one account, provides voice prompts and receipts in 10 languages, and gives the consumer the option of entering up to nine speed dial numbers. SendGlobal allows the international caller to place calls by pressing just two buttons from a home phone or three buttons from a cellular phone.

About TeleCents Communications, Inc.

TeleCents Communications is a leading innovator in the prepaid calling field. TeleCents, a privately held company, is fully licensed by the Federal Communications Commission as a carrier and service provider and focuses on saving the consumer both time and money while providing a quality service.
